

**Dr. Saket Asthana** did his M.Tech. in Materials Science and Technology in 2001 and secured a **Gold Medal** from Indian Institute of Technology BHU (IIT BHU), India. He had worked on manganites during his Ph.D from Indian Institute of Technology Bombay. From November 2006 to October 2007, he worked as BK-21 Postdoctoral Researcher at Nano-Spintronics Laboratory, Department of Physics, Kyungpook National University, Daegu, South Korea. He worked on spin crossover molecular materials, in the group of Dr. J-F Letard at ICMCB-CNRS laboratory, Bordeaux, France from December 2007 to February 2010 as CEFIPRA and researcher. Since March 2010, he has been working as Assistant Professor in the Department of Physics, Indian Institute of Technology Hyderabad. Dr. Saket Asthana established *Advanced Functional Materials Laboratory* at IIT Hyderabad.

He is presently working on ferroic materials and its fabrication for MEMS-based applications. He has published more than 25 papers in peer reviewed international journals. One of his papers is selected for *Hot topics in Magnetic Materials* by Wiley (<a href="http://www.wiley-vch.de/util/hottopics/magnetic/">http://www.wiley-vch.de/util/hottopics/magnetic/</a>; *Chem. Eur. J.* 18 (2012) 5924).
